

FAREEN NATHRAH BINTI YUSRI

Address: No 5, Jalan BS 22A, Taman Bertam Setia, 76450 Melaka
Phone: +60103344971
Email: fnathrah@gmail.com

SUMMARY

Goal-oriented Computer Science student with a focus on Artificial Intelligence and software development. Experienced in building AI agents and mobile applications using frameworks like React Native and Streamlit. Proven ability to apply Machine Learning and Computer Vision to practical projects, including a camera surveillance system and automated data tools. Dedicated to using modern AI technologies to create efficient and functional digital solutions.

WORK EXPERIENCE

IT Support Internship, UiTM Kampus Bandaraya Melaka Jan 2024 - September 2024

- Troubleshoot wifi problem in the campus
- Do printer installation in the campus
- Do administrative work by approving computer equipment rental in the campus

EDUCATION

Bachelor of Computer Science with Artificial Intelligence with Honours Mac 2025 - Present
Universiti Teknikal Malaysia Melaka

- CGPA : 3.56 (Current)
- Relevant Courses : Natural Language Processing, Machine Learning, Neural Network

Diploma in Computer Science August 2022 - Jan 2025
Universiti Teknikal Malaysia Melaka

- CGPA : 3.46
- Relevant Courses : Data Structures, Web Dev, Databases, Data Communication & Networking, Data Science, Cloud Computing

PROJECTS

Camera Surveillance System Using Multi-Modal LLMS
Final Year Project for Diploma Computer Science

- Develop a camera surveillance system using Google Gemini 1.5 Flash for object and behavior recognition to reduce false alarms and improve monitoring
- Module: Object Recognition, Behavior Analysis, Alert System

Home Assistant Mobile Client (React Native)

- Developed a custom mobile application interface for the Home Assistant ecosystem, designed to provide streamlined control and monitoring of smart home devices from a mobile device
- Cross-Platform Architecture: Built a robust, scalable mobile foundation using React Native and Expo to ensure consistent performance across different mobile operating systems

DiaBot Analytics Forge

- An autonomous AI agent swarm built with the Gemini Nexus ADK. DiaBot dynamically cleans messy medical datasets and trains predictive ML models using self-healing code execution and Gemini 2.5 Flash
- This project was built during the Hackathon, The Agentverse: Gemini Nexus, organized by Google Developer Groups on Campus by UTM

ADDITIONAL INFORMATION

- **Technical Skills:** Python (Programming Language), React Framework, Streamlit, JavaScript, TypeScript, SQLite
- **Languages:** English, Malay, German.
- **Certifications:** Google Cloud Computing Foundations: Data, ML, and AI in Google Cloud, Prompt Design in Vertex AI (Google), Prepare Data for ML APIs on Google Cloud, Build with AI Hackathon Certificate
- **Extra curricular activities:** Being facilitator in SULAM in 2022, Being AJK in Indoor Rowing Sukan Antara Fakulti-16 2022, Involved in Faculty of Information and Communication Technology Society Buddies
